#### **Week 4**

I brainstormed on app ideas, decided on two options to present at the zoom meeting. After the meeting we decided on an idea, I worked on the concept of the app and what it would be like and set up the initial github repo.

#### **Week 5**

This week I brainstormed on which features the app would need and reviewed the proposal.

#### **Week 6**

This week I worked on what we would need for requirements gathering, looked up various surveys and wrote the draft for the survey. I also spent some time getting familiar with figma (not logged as work).

#### **Week 7**

Got feedback on the survey, worked on finalizing it with my partner. Initially put the questions on SurveyMonkey.

#### **Week 8**

Midterm week – changed the survey platform to Google forms for easier collaboration.
