Starting after the requirements document submission (week 10, Nov 2, 2025).

Week 11

This week I did Figma research and building the protocol. Following the mood board, choose the main color theme. I start building the main navigation bar, along with the corresponding pages, such as home, search, and leaderboard.

Week 12

This week I continued to work on the Figma protocol. In addition to the main pages, I build some examples for events, pages to describe the events and event holders. Also try to figure out how to link the pages and components. I also started to draft the user study survey questions.
